DA WEEKLY REPORT HIGHLIGHTS

25X1

- An OS representative gave a briefing on Soviet espionage in the United States at the Federal Bureau of Investigation's Counterintelligence Seminar. Participants included security managers from over 100 industrial contractors and several federal agencies.

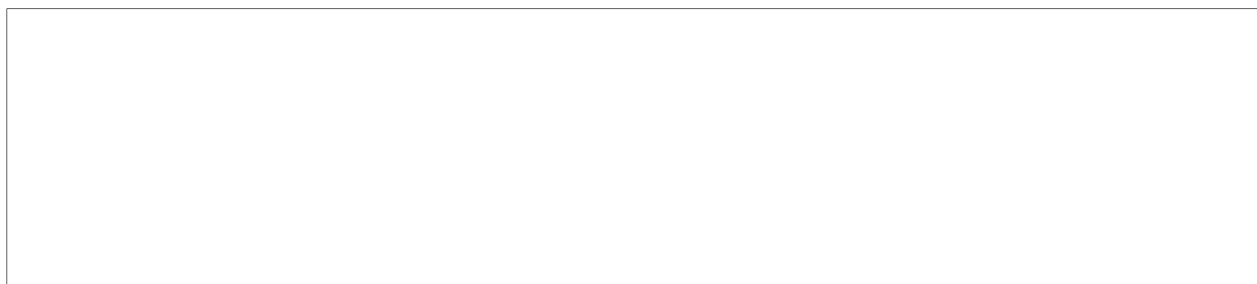

25X1

- The Office of Logistics (OL) reports that the first workshop on procurement integrity was held on 15 May. One hundred forty attendees from the Offices of General Counsel (OGC), Financial Management, Security, and Logistics heard speakers from OGC and OL discuss the new Headquarters Notice and Procurement Note, new legal prohibitions, Federal Acquisition Regulation clauses, post-employment restrictions, and certification requirements. Additional training in procurement integrity will be coordinated between OL and the Office of Training and Education.

SUBJECT: DA Weekly Report Highlights

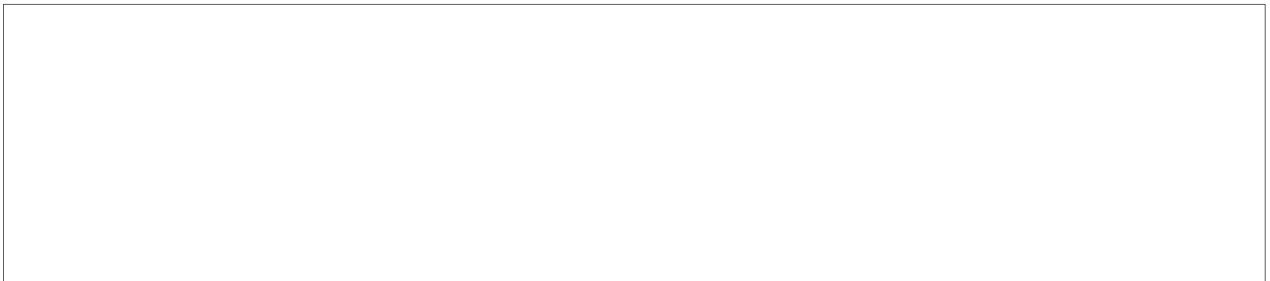

25X1

- OTE conducted the first running of the "Chemical and Biological Warfare (CBW) Course" for 61 students from the Agency, the National Intelligence Council, the Intelligence Community, and U.S. Army. The course provided an overview of production and deployment of biological and chemical weapons, and featured case studies on Libya, the Iran-Iraq war, and Soviet CBW production. 

25X1

25X1

- In recognition of Asian-Pacific American Heritage Week, the Office of Personnel's (OP) Office of Equal Employment Opportunity (EEO) hosted a reception for all Asian-Pacific American employees. EEO plans to meet again with these employees to discuss issues of concern to them.

SUBJECT: DA Weekly Report Highlights

- OP issued its first worker's compensation claimant checks, a function previously performed by the Department of Labor.
- Office of Medical Services representatives treated the National Photographic Interpretation Center cooling tower water with a biocide after a contractor detected Legionella contamination. Post-treatment sampling found the water to be free of Legionella. The water will be regularly sampled and treated to prevent future contamination.
